Modern Workplace

Transforming Your Business to
Enhance Productivity, Collaboration
and Mobility

What is Modern Workplace

In today's digital age, the way we work is constantly evolving. The role of IT in a business setting has been elevated, with a focus on accessibility, productivity and security for the company, its employees, and data.

The concept of Modern Workplace represents the cutting edge of workplace technology, combining the power of cloud computing, artificial intelligence, and collaborative tools to create a truly dynamic and innovative work environment.

Modern Workplace is a suite of cutting-edge technologies and tools that enable people to work smarter, more efficiently and collaboratively. With features like remote collaboration, real-time communication, and seamless integration between applications, Modern Workplace empowers individuals and teams to be productive and achieve more, no matter where they are working from. This suite is designed to help businesses stay ahead of the curve, embrace the latest technologies and adapting to the evolving work.

National Reach
with a Local Focus

mspcorp.ca

Modern Workplace:

- ✓ Allows employees to work from anywhere, at any time, using their own devices.
- ✓ Encourages collaboration and teamwork, allowing employees to work together and share information easily.
- ✓ Is built on cloud-based technologies, which allows for easy access to data and applications from anywhere.
- ✓ Uses automation to streamline processes and improve efficiency.
- ✓ Uses data and analytics to make informed decisions and measure performance.
- ✓ Places a strong emphasis on cybersecurity, to protect sensitive data and keep the organization secure.
- ✓ Encourages employee engagement and empowerment, and fosters a culture of innovation, creativity, and continuous learning.
- ✓ Is agile and adaptable, able to respond quickly to changing market conditions and customer needs.
- ✓ Performs regular backups of employees' work in order to preserve business continuity
- ✓ Includes Information Security Awareness Training to promote a shift in corporate culture and human behavior toward a more security-conscious organization.

The Benefits

- ✓ Familiar interface: Windows is a widely used operating system, making it easy for users to navigate and find the tools they need.
- ✓ Compatibility: Modern Workplace is compatible with a wide range of software and hardware, making it easy to connect to other devices and programs.
- ✓ Productivity tools: Modern Workplace includes a variety of productivity tools, such as Microsoft Office, which can be used to create documents, spreadsheets, and presentations.
- ✓ Security features: Modern Workplace includes built-in security features such as Windows Defender, which can help protect your device from malware and other security threats.
- ✓ Remote access: Modern Workplace allows you to remotely access your files and applications, so you can work from anywhere on any device.
- ✓ Scalability: Modern Workplace can be used on a variety of devices and it's easy to scale up or down depending on your needs.

MSP Corp uses a suite of technology to digitally transform your business and improve employee productivity and satisfaction, create easy communication across the business, promote collaboration and maintain security and integrity of systems and data.

The Modern Workplace Solution Includes:

Microsoft 365: a suite of productivity tools includes applications such as Word, Excel, PowerPoint, and Outlook, and can be accessed from any device with an internet connection.

Microsoft SharePoint: a web-based platform that enables teams to share and manage content, knowledge, and applications, and also enables to create intranet, extranet, and internet portals.

Microsoft Teams: a collaboration platform that allows teams to communicate, share files, and collaborate on projects in real-time.

Microsoft Azure: a cloud computing platform that provides a range of services, including virtual machines, storage, and networking, and enables to build, deploy and scale applications.

Microsoft Intune: a cloud-based endpoint management solution, It manages user access and simplifies app and device management across your many devices, including mobile devices, desktop computers, and virtual endpoints.

Cloud-Based Backup: a service that securely stores copies of data on remote servers, ensuring data protection and recovery in case of local failures, such as hardware malfunctions, theft, or natural disasters.

Cloud-Based Security: a service that protect data, applications, and infrastructure from cyber threats, providing real-time monitoring, threat detection, and automated response to unauthorized access.

How MSP Corp Supports Modern Workplace

MSP Corp supports Canadian businesses in building a modern workplace that empowers employees and strengthens productivity. We help SMBs adapt to hybrid work, enhance collaboration, and stay secure with solutions that scale to your needs.

Microsoft 365 Optimization

We make sure your Microsoft 365 tools work the way they should. From setting up Teams and SharePoint to improving collaboration and automating daily tasks, we tailor the platform to fit how your business actually works. The result is smoother communication and fewer technology headaches.

Managed Cybersecurity Services

With Guardian Shield, our 24/7 monitoring ensures that threats are detected in real time, no matter when they occur. Our team is ready to respond immediately, helping to contain incidents before they cause major disruption. This continuous oversight means you can focus on running your business while we handle the technical side of security.

Workplace Enablement

We provide ongoing support and training so your employees can get the most out of their tools. From improving workflows to building confidence with cloud solutions, we give your team the knowledge and resources they need to thrive in a modern, flexible workplace.

Working with MSP Corp means you get more than just a service provider. You gain a partner who's invested in your success, your security, and your ability to thrive in a changing threat landscape.

We also offer:

- ✓ **Artificial Intelligence**
Microsoft Copilot implementations
- ✓ **Data Analytics**
Data migration, visualization and reporting
- ✓ **Data Governance and Compliance**
Information architecture & management and Privacy as a Service
